

91.0 - Introduction - Post Compromise AD Enumeration

POST-COMPROMISE AD ENUMERATION

- ✓ We've compromised a user. Now what?
- ✓ There are a few tools that offer quick, and efficient enumeration
 - Bloodhound
 - Plumhound
 - Ldapdomaindump
 - PingCastle
 - And whatever else your heart desires

TCM Security

We are going to be learning the how and what tools to use to enumerate an Active Directory Domain Controller machine.
